

Dear Editor:

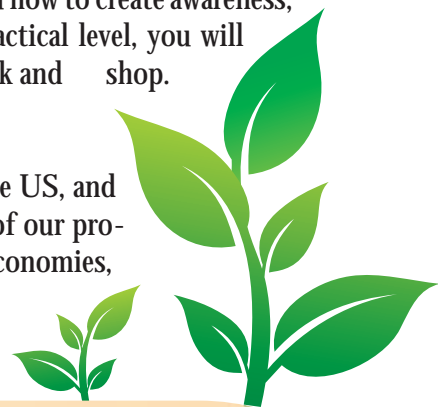

Today's environmental scientists concur that the activities of many of the 6.6 billion humans on earth are contributing to the warming of our planetary climate. As a result of this global warming trend, catastrophic events are forecasted – events that would definitely ruin your day, maybe even your life, your children's lives, and their children's lives too, if we make it that far.

Fortunately this bleak forecast is not inevitable. We can take many actions today to avert global catastrophe. If you like so many others, are eager to alter the course of climate change, let 50 Simple Steps be your roadmap! This practical and approachable guide to protecting our planet from global warming will inspire and empower you to begin making changes for a greener lifestyle today.

This book teaches you how a sustainable lifestyle benefits other pressing issues including national security and the future of our economy. It also shows you how to create awareness, enthusiasm, and support for your green lifestyle. On a very practical level, you will learn to improve the quality of your life and change the way think and shop.

About the Author

The Green Patriot Group, led by David Steinman, is based in the US, and teaches people to practice sustainability. It also teaches that all of our pro-environmental efforts will directly or indirectly strengthen our economies, and build a safer and more secure future for our children.

## 50 Simple Steps to Save the Earth from Global Warming
